

Tidepool Sea Creatures

The tidepools are home to hundreds of sea creatures, be kind and don't move their furniture (in the form of rocks and shells), don't transport them to a bucket or another location because it can kill them.

~ You need to take care of the earth and her creatures so she can take care of you. ~

Sea Life Chart courtesy of Crystal Cove State Park

Sea life eats food just like you and me.

How do they find food?

What do they eat?

Sea life needs shelter just like you and me.

Where does the hermit crab live?

Where do fish hide? crabs hide?
